

REPORT ON AVERAGE NUMBER OF CERTIFICATES OBTAINED PER YEAR

Introduction:

This report provides an analysis of the average number of certificates obtained per year from 2018 to 2023 excluding 2021.

Methodology:

The total number of certificates obtained from 2018 to 2023 was calculated by adding up the number of certificates obtained each year. The average number of certificates obtained per year was then calculated by dividing the total number of certificates by the number of years.

Results:

The total number of certificates obtained from 2018 to 2023 is 46.

Year	Number of Certificates
---	---
2018	10
2019	3
2020	7
2022	10
2023	16

The average number of certificates obtained per year is 9.2.

CONCLUSION:

The average number of certificates obtained per year from 2018 to 2023 is approximately 9.2. This indicates a relatively stable trend in the number of certificates obtained per year.

RECOMMENDATIONS:

- Continue to monitor the number of certificates obtained per year to identify any trends or patterns.
- Analyze the factors that contribute to the number of certificates obtained per year.

- Develop strategies to increase the number of certificates obtained per year, if necessary.

A handwritten signature in blue ink, consisting of a horizontal line with a stylized, cursive flourish above it.
